

ROAD MAINTENANCE INFORMATION

The roadwork is done in May but can be in early June. It usually consists of grading and putting down some recycled asphalt. It can run for four or five days depending on the extent of the work to be done and the weather. Equipment used is a large grader, dump trucks, water truck, and a large machine for packing down the road. Usually, the road is impacted for 10 - 14 hours on maintenance days.

A warning is usually given in advance of the workdays. We try to post warning signs to expect delays and alert you to the danger of equipment on the road.

Please remember your fellow residents working on the maintenance days are unpaid VOLUNTEERS and do not respond well to negative comments or actions. Please cooperate. Do plan your road use needs on the days of scheduled maintenance so as not to interfere with the work or be upset by delays you may experience.

The Sampson Road Association is charged by Court Order with the maintenance of Sampson Road and Mill Hollow Road. Sunburst Road Association coordinates the workdays for maintenance on Sunburst Road with SRA work.

If you have comments or questions concerning the maintenance work please ask a SRA Board Member or at the two general meetings of the SRA, which are usually held in late May or early June and the Annual Meeting in September. Please consider learning something of the past road experiences and the limited nature of our budget for road work before condemning the efforts of the SRA Board of Directors and the volunteers who work on the road. Nothing kills volunteers' hard work ethic quicker than negative comments from someone who has not been involved and has no background knowledge of what the history of the road maintenance efforts has been. Express your ideas but do not be offended if the response is less than enthusiastic from those who have and will actually do the work.
